Full-stack engineer and co-founder who ships products end to end: product, backend, AI agents, infra and mobile. Co-founder & CTO at DynoWeb and Deksie, CTO at Kaafila; built Karmyug AI on my own (8,000+ users in its first 4 days) and run Yantratools, a marketplace with 62K+ customers.

Education

- **RCC Institute of Information Technology (RCCIIT)** — Kolkata, India
  Bachelor in Technology (Computer Science and Engineering (AI.ML)); ***CGPA: 8.23*** — *July 2023 – Present*
- **JASHORAJPUR SRINATH CHARAN VIDYAYATAN** — Paschim Medinipur, India
  Higher Secondary (stream: science) ; ***Percentage : 91%*** — *Dec 2021 – Dec 2023*

Experience

- **DYNOWEB** — Remote , Dubai
  Co-founder & CTO — *Feb 2026 – Present*
  - Lead engineering on an AI conversion-optimisation app for Shopify (session replays, heatmaps, AI agent, popups, SEO autopilot); installed on 74 stores.
  - Wrote ~70% of 3,000 commits and shipped 150 releases in 5 months.
  - Built the tracking pipeline (1.3M+ click events a month), revenue attribution, and DynoAgent, a Gemini tool-calling agent with approval and one-step undo, also exposed as an MCP server with OAuth 2.1.
  - Built canary deploys on GCP Cloud Run with auto-rollback; removed stale revisions that were 67% of the Cloud Run bill and cut the image registry from 127 GiB to 35 GB.
  - **Tech Stack**: TypeScript, React Router, Prisma, Postgres, GCP, Vercel AI SDK, Gemini, GitHub Actions.

- **DEKSIE (CTRLZED)** — Remote
  Co-founder & CTO — *Dec 2025 – Present*
  - Built most of an agency operations SaaS (CRM, projects, client approvals, contracts, finance, AI assistant): ~83% of 1,361 commits.
  - Go API with 598 routes and 100 migrations; Next.js 16 app with 92 routes.
  - Designed a money-safe finance module (idempotent payments, reversal rows, derived balances, PDF invoices) and an AI assistant on read-only SQL views.
  - Led security hardening: fail-closed RBAC, SQL injection and cross-tenant fixes; a 249-finding audit fixed in 14 PRs.
  - **Tech Stack**: Go, Echo, GORM, Postgres, Next.js 16, React 19, Tailwind 4, Vertex AI.

- **KARMYUG AI** — Remote , India
  Full stack engineer (freelance, sole engineer) — *Sep 2026 – Oct 2026*
  - Built an AI training-data platform end to end in about 4 weeks: public site, worker PWA, admin panel and a NestJS API (37 models, 200+ routes).
  - 8,000+ workers signed up within about 4 days of launch; load-tested 80 concurrent recorders (1,807 recordings in 90 s, 0 errors).
  - Moved the live platform (API, website and database, ~4,000 users) from Supabase and Vercel to GCP Cloud Run and Cloud SQL with no data lost.
  - Built browser and server audio QC, KYC, fraud signals and payouts.
  - **Tech Stack**: Next.js, NestJS, Prisma, Postgres, GCP, Python, faster-whisper.

- **YANTRATOOLS** — Remote , India
  Platform engineer (freelance) — *Sep 2026 – Present*
  - Run a live tools marketplace with 62K+ customers and 2,800+ products.
  - Built the whole seller side: Angular seller portal, 100+ seller API routes, a shared wallet ledger, and an Expo Android seller app with push and OTA updates.
  - Added backups (EBS snapshots, nightly verified MongoDB dumps to S3, restore drills) and CI/CD for 4 apps with atomic releases and self-reverting health checks; integrated Bigship shipping.
  - **Tech Stack**: Node.js, Express, MongoDB, Angular, Expo, AWS, GitHub Actions.

- **KAAFILA** — Remote , India
  CTO (equity) — *Oct 2026 – Present*
  - Lead the tech for a group-travel marketplace: NestJS API, React web and admin, Expo iOS and Android app (on TestFlight), Razorpay, and a Gemini voice assistant that edits live trip plans.
  - **Tech Stack**: NestJS, Drizzle, Supabase, React, Expo, Gemini, Razorpay.

- **FLUXMAP** — Remote , Dubai
  Full stack developer — *Oct 2025 – Nov 2025*
  - Developed the website frontend, backend and CI/CD pipeline.
  - Managed production database operations and executed a precise cleanup of 90K PII records, ensuring zero downtime and data integrity.
  - **Tech Stack**: TypeScript, Next.js, Postgres, Node.js, Nest js, Tailwind CSS, REST APIs, Github, Figma, Stripe api.

- **LINEUPX** Remote , India
  Frontend developer *May 2025 – Oct 2025*
  - Developed new features in the frontend and integrated them with the backend.
  - Made pixel-perfect UI from Figma designs.
  - **Tech Stack**: TypeScript, Next.js, CSS, Tailwind CSS, Figma.

- **LASTMINUTEENGINEERING** Kolkata, India
  Lead developer/Co-founder *May 2024 - Present*
  - Grew the platform to 11K+ active users and 1M+ page views, with 5K+ YouTube subscribers and 3K+ WhatsApp channel members; traffic jumps about 10x in exam weeks.
  - Developed the official website for the company.
  - Developed a company website, integrating AI features, resulting in a 20% increase in user engagement.
  - Led integration efforts, optimizing system workflows and improving efficiency by 15%.
  - **Tech Stack**: TypeScript, Next.js, Firebase, Node.js, Express.js, Tailwind CSS, REST APIs, Github, Groq llm.

Skills Summary

- **Languages**: JavaScript, TypeScript, Go, Python, SQL, HTML5, CSS3, C, C++
- **Libraries and Frameworks**: React.js, Next.js, React Router, Angular, Node.js, NestJS, Express.js, Echo (Go), Prisma, Drizzle, FastAPI, Socket.io, Redux, Tailwind CSS, Framer Motion, React Native / Expo, Vercel AI SDK, Langchain, n8n, Huggingface, TensorFlow.
- **Cloud and Tools**: GCP (Cloud Run, Cloud SQL, Cloud CDN, Cloud Storage), AWS (EC2, S3, EBS), Vercel, Firebase, Supabase, Docker, GitHub Actions, Sentry, Git, Postman, Swagger, Claude Code.
- **AI**: Tool-calling agents, MCP servers, Gemini / Vertex AI, RAG, LLM evals, audio QC (faster-whisper).
- **Database**: PostgreSQL, MongoDB, MySQL, SQLite, Neon.

Projects

- **Ai Chatbot Builder** Next js, Vercel ai sdk, MongoDB , Tailwindcss, Groq LLM etc
  Frontend + AI integration
  - Built a platform enabling organizations to **create custom AI chatbots** with tools like **ticket booking, promotional flags, and analytics**.
  - With a simple form, organizations can provide relevant data about their entity and enable tools (such as ticket booking, promotion flags, etc.). The chatbot is created by fine-tuning a pre-deployed model, like Groq Llama, to align with the organization's specific needs.
  - Used vercel ai sdk for using the ai model.
  - **Links**: **Working Demo**, **GitHub Repository**.

- **IntelliSupply** TypeScript, Next js , supabase , vercel ai sdk , Shadcn etc
  Frontend, Backend, and Ai agent system
  - IntelliSupply is an enterprise platform that uses AI-powered digital twins and LLMs to simulate supply chain disruptions, predict operational risks, and recommend real-time mitigation strategies. Links: Demo Video
  - Designed the responsive frontend.
  - Built the full AI agent system and integration with the frontend.

- **Lastminuteengineering** TypeScript, React.js, Next js, Tailwind CSS, Gemini LLM., Firebase etc
  Complete Frontend, Backend, and Database Infrastructure
  - Developed an AI-powered platform for seamless student learning, offering features like **AI-generated notes, topic specific YouTube videos, and customized practice questions**.
  - Improved student productivity by **integrating personalized AI support**.
  - **Links**: **Deployed Link**, **GitHub Repository**.

Honors / Achievements

- **100agentdev winners** : Won renowned international hackathon over 600 teams.
- HACKFEST 1ST Runner Up : Secured 2nd position in this hackathon organized by **IIT Dhanbad**.
- **5,371 GitHub contributions** in the last 12 months.
- NSS Web dev Lead : Manage college NSS website.
